## SHOOT TO THRILL AT YOUR EVENT

**VirtualEventz enables you to experience the skill and challenge of clay pigeon shooting, the world's most popular shooting sport, at any corporate or fundraising event, including promotional activities, exhibitions, product launches, charity fundraising or even private parties.**

Using authentic, de-activated 12-bore shotguns, advanced Lasersport technology enables players to fire an infrared beam at the reflective and reusable clays while the sophisticated sound effects realistically replicate the report of the gun. Up to five participants can shoot at the same targets which may be launched from a variety of positions at different speeds and angles. A number of games are available, requiring different levels of skill and accuracy.

The Lasersport clay pigeon system is not restricted to daylight. With the use of fluorescent clays this activity can be enjoyed in the evening, and with the adapted flash guns this can make it a fun and exciting spectacle.

The unit can be set up outdoors on grass or in a car park where space permits. The system does not require any mains power which provides greater scope for use and placement. No experience of shooting is necessary and it can be enjoyed by anybody. Spectators are able to watch in safety and it will provide a great point of interest at any event as the crowds gather.

**Hit your target at any event.**
