

# REV IT UP!

## GET UP TO SPEED **AT YOUR EVENT**

**VirtualEventz lets you recreate the excitement of some of the world's most exciting motorsport courses at any corporate or fundraising event.**

Combining the advanced technology of Sony's award-winning Gran Turismo 5 Prologue software with GamePod racing simulators, players can choose from a range of cars, internationally acclaimed courses and a variety of race types. The superb graphics, realistic sound effects and authentic handling of the vehicles make this a winning formula.

Developed in conjunction with professional race drivers and using authentic Cobra racing seats, the GamePod system is designed to replicate the exact driving positions of today's most advanced racecars.

The Logitech G25 steering wheel and pedals give the driver precision control around some of the most challenging professional courses in the world.

Suitable for individual or multiple players, the simulator can be used in arcade mode or for competitions including time trials and fastest lap offering a great opportunity for data capture. A live leader board can be set up anywhere in the venue allowing spectators to track the action remotely.

**A popular attraction at any event, it's guaranteed to appeal to the inner Stig in everyone!**
