

GET IN THE SWING

BRINGING WORLD-CLASS GOLF TO YOUR EVENT

VirtualEventz allows you to bring the thrill of teeing off at Pebble Beach or playing the road hole at St Andrew's Old Course to any corporate or fundraising event.

GPS Golf Simulation software is the world's most advanced golf simulator providing an experience that is as close to playing golf as possible without actually being on the course. Some of the world's leading golf courses are projected on to the high definition screen, real balls are hit with real clubs and the simulator does the rest in virtual reality.

Be amazed at the incredible realism of the software with leaves, grass and trees moving in the wind and shifting reflections across the water. For team-building events or fundraising activities, competitions including Longest Drive and Nearest the Pin can be arranged.

The self-contained inflatable or rigid framed unit is ideal for corporate entertainment, promotional activities, exhibitions, product launches, charity fundraising or even private parties.

Where appropriate, corporate graphics and promotional material can be quickly and easily attached to the exterior of the simulator, providing valuable publicity.

Bring your event up to scratch with VirtualEventz.
